

**A Great
Way
to
Find**

Scholarships

ScholarshipsCanada.com has recently made some changes that make it easy for you to search and find scholarships that are right for you! **Students can now create their own 'my scholarships' profile in seconds and our database will return results based on the information you submit including your year of study, program or school of study, special needs and other interests or affiliations.**

You can also use our search filters to find scholarships specific to your school or program or search by scholarship name or provider. Once the results of your search are returned you can **sort by value or deadline** to get the most current scholarships and the ones with the highest value! If you're in a hurry checkout our feature scholarships section on the site.

Once you've found the scholarships that are right for you, view more detailed information about the scholarship and find out how to apply. Share scholarships with friends or keep it to yourself and **apply before the deadline ends!**
